

Press Release. 1<sup>st</sup> September 2004

## **SPIRIT ANNOUNCES NEW GOTIVE ENHANCEMENTS**

Spirit Data Capture Limited has announced new enhancements to the Gotive H41, a rugged handheld computer. Spirit has the UK and Ireland distribution rights for this mobile enterprise solution, which revolutionises the collection and communication of information.

The latest version of the Gotive H41 (Model 5) provides enhanced operability and an increased memory. Its RAM capacity has been doubled to 64MB, and the Gotive now supports both SD and MMC memory cards. The unit's WLAN signal range has been extended to a maximum of 180 metres in the open air, to provide wider and faster coverage. Two exciting new options that can be added to the unit are an integral Smart Card Reader and Destinator 3 GPS navigation system.

The new RS version of the H41 has a serial interface RS232/422/485 option, which allows items such as electronic measuring devices to be connected to the unit. The Gotive incorporates Bluetooth® technology, and can now be used with Extech mobile thermal and receipt printers - making it ideal for any

mobile workers who need to take payments, produce receipts or produce labels.

New Developers' kits are also available from Spirit. These include a Gotive; a Docking Station; and an Accessories pack. There are three different configurations available. The latest model comes with a new lightweight carrying case, and an optional Travel Charger is also available.

ENDS

**Notes for Editors:** Spirit Data Capture is based in Preston Brook, Cheshire. The company is a totally independent mobile computing and data capture house, with in-depth knowledge of the latest wireless and mobile computing technologies which boost productivity and profitability. Its services include planning, design and development, implementation, and support.
