

Press Release. 12th September 2005

TIME TO 'XPLORE' THIS AWARD-WINNING TABLET PC!

Xplore Technologies® Corp has received two prestigious 'Editor's Choice' Awards from Pen Computing and from TabletPc2 for its innovative iX104C2V™ tablet PC. Xplore is a leading international supplier of rugged tablet PCs. In the UK and Ireland, the company's products are distributed by Spirit Data Capture Limited.

The iX104C2V uses AllVue™ LCD technology, which enhances the PC's display, increasing the screen's brightness and clarity. It can be used in all lighting conditions, including direct sunlight. The product won the 'Best Rugged PC Tablet' award from Pen Computing and 'Best Indoor Display' from TabletPc2. The winning factors included the unit's durability; its LCD view capability; its industrial design; and its use of advanced technology.

Conrad Blickenstorfer, Pen Computing's Editor-in-Chief, explained: "Sporting exemplary industrial design, the flagship iX104C2V Tablet PC is extremely tough, technologically completely up-to-date, yet also has an attractive industrial design. Its AllVue™ display is superior to anything else we've seen."

Linda Epstein, TabletPc2's Editor and Publisher, added: "When it comes to outdoor displays that we have used, reviewed and photographed for TabletPc2.com, the Xplore iX104 Rugged Tablet PC wins our Editor's Choice. The depth of colour on the iX104 display is excellent and it remains clean and clear both indoors and out."

Ebbie Khadem, Managing Director of Spirit Data Capture Limited, comments: "We are delighted that the strengths of the iX104 have been recognised in this way. Xplore is the only rugged tablet PC vendor to offer Allvue™ technology as an optional upgrade to its solutions. There is a huge potential market for its products in the UK, and these awards can only help to boost interest in the benefits of rugged tablet PCs."

ENDS

Notes for Editors: Spirit Data Capture is based in Preston Brook, Cheshire. The company is a totally independent mobile computing and data capture house, with in-depth knowledge of the latest wireless and mobile computing technologies which boost productivity and profitability. Its services include planning, design and development, implementation, and support.
