

Graduate Software Developers

- 
- Join a dynamic and growing IT company based in Cheshire
 - Play an active role in a range of fascinating projects
 - Work with cutting-edge technology to develop innovative solutions

This could be the job for you - and could open up further exciting career opportunities.

Salary: Competitive + bonus + benefits

Spirit is an expanding IT company, based in Cheshire. We provide rugged mobile data capture solutions to large blue-chip clients. Check out our website for more information –

www.spiritdatacapture.co.uk.

Due to an increase in new projects we're looking for enthusiastic Graduate Software Developers to join our existing team.

This is a great opportunity to grow your skill set and gain real hands-on development experience.

The Role

Developing and improving software using C#, SQL and Javascript, working on bespoke and off-the-shelf solutions. You'll be part of an Agile team, with exposure to all aspects of the software development lifecycle. You'll also be able to gain skills in Entity Framework, MVC, Linq, Xamarin, SQL, Restful Services, and Application Lifecycle Management.

Essential requirements

- Degree in Computer Science or related course
- Experience of programming in C# or Java or related OOD language; and of using SQL
- Good communication skills

Further useful experience might include a final-year project in .NET development; experience in Entity framework, ASP / MVC, HTML / CSS, or Mobile Development; knowledge of JavaScript; an awareness of Traditional vs Agile project management; Design patterns; and Testing.

How to apply

To find out more, please contact samantha.rhodes@spiritdatacapture.co.uk.
