

Mobile Go Live!

Maximise the efficiency of your mobile estate with minimal cost and effort.

Spirit is committed to making life easier – enabling you to focus on **your** business.

We've therefore developed a package that's designed to simplify and support the implementation of your mobile enterprises.

Spirit. Bringing efficiency to life

spirit[®]
DATA CAPTURE LTD

Mobile Go Live! is an important element within Spirit's Managed Services portfolio. It's a comprehensive solution that includes:

- A choice of hardware
- Gold build creation and provisioning
- Mobile device management (including device tracking)
- Help desk
- Comprehensive cover (including service provisioning)

This is an important service that also represents excellent value for money, because it's:

- **Cost-effective** – Mobile Provisioning represents an affordable way of implementing an effective enterprise mobile data capture solution.
- **Efficient** – Our service saves you time and reduces the demands on your IT department. It includes an extensive managed service package.
- **Flexible** – You have the choice of the type of devices you want to use and how you want them to be configured.

Getting down to details

Our Mobile Go Live! service is based on a three-year minimum term. The service includes a technology fund which you can use to purchase a renewal contract at the end of the term.

Key features

Hardware

We offer a complete range of consumer and rugged mobile devices, from smartphones and tablets through to PDAs and mobile printers.

Our package is very flexible, and includes options such as accessories and a rugged case for your mobile device.

We can also provide additional services, including the manufacturer's hardware service contract.

Gold build creation and provisioning

We can set up and configure all of your equipment and software, in line with Gold Build specifications created specifically for your business.

Mobile device management

We'll provide you with a sophisticated and hosted mobile device management solution, including full support. This will enable you to optimise the use of your devices and track them if they are lost or stolen.

Help desk

Our Managed Service Helpdesk package comes with SLAs and provides technical support and device repair management.

Cover

Our comprehensive cover includes features such as training options and holding buffer stock on your behalf.

Key benefits

Some of the key benefits you will enjoy include:

- **Effectiveness:** Your business will always have up-to-date mobile devices.
- **Versatility:** You can potentially rent the devices just for seasonal periods if necessary.
- **Peace of mind:** Our solution removes a lot of hassle – and there's no requirement for you to purchase
