

*We give you instant access to critical business information - how, where and when you want it.*

## Spirit News - Transform your Quality Assurance Inspections!

With our new, state-of-the-art QAI software, you can:

- Save time
- Save money
- Save paperwork

Our software is very versatile and is ideal for companies involved in facilities management, cleaning, fire alarms, inspections or insurance – and for Local Authorities, Housing Associations, Care Homes and Universities and Colleges.

QA inspections by mobile workers need to be both fast and effective. Spirit's versatile QAI software module will help you to:

- Streamline the whole QAI process
- Carry out inspections rapidly, using pre-determined standards
- Identify and fix faults quickly and easily

Our QAI module includes:

A mobile app that runs on Android smartphones or tablets. You can:

- Choose a building, area or item to inspect.
- Answer a series of questions as Pass or Fail (with reasons for a Fail).
- Sign the form electronically and transmit the results back to the dashboard.

A web dashboard viewed via Internet Explorer or Google Chrome. You can:

- Set up and configure the system and assign tasks.
- Create and modify forms using your own pre-defined standards.
- Access and analyse the inspection reports for compliance and trends.

Our solution enables you to rapidly identify any issues and actions that need to be taken. No more double entries. No more varying standards. No more doubts about what needs to be fixed.

To find out more, please [visit our web site](#) or call us on 01928 718800 to discuss your specific QAI needs.
