

Press Release. 16th March 2005

NEW GOTIVE ANNOUNCED BY SPIRIT

Spirit Data Capture Ltd has announced the arrival of the Gotive H42 - a new generation version of Gotive's popular Wireless Enterprise Communicator, the Gotive H41. Spirit owns the UK and Ireland distribution rights for the new handheld computer, which incorporates powerful data collection and communication capabilities.

The Gotive H42 builds upon several of the features of its successful predecessor, including the large half-sized VGA screen. The new model has a HVGA colour display and touch screen, with STN and TFT options. It also offers greater processing power, by using an Intel® Bulverde processor (520MHz) and increased memory (128MB RAM and 246MB ROM).

The new Gotive continues to be extremely versatile, and provides a choice of radio options, including WPAN (Bluetooth); WLAN (802.11b); and WWAN (GSM/GPRS). It also offers a range of input options, including a touch screen, a barcode reader, an imager, and an RFID reader. Despite its compact size, the Gotive H42 is also very rugged, and boasts an IP54 rating.

There will be a range of further exciting optional features available with the new Gotive H42. These include a biometric fingerprint reader and a smart card reader.

Ebbie Khadem, Spirit's Managing Director, comments: "The Gotive H41 has proved very successful. The new model builds upon this success, and provides even greater functionality. Its power and versatility make it the perfect choice for many different applications across a wide range of market sectors - such as logistics, field service, utilities, construction and healthcare."

ENDS

Notes for Editors: Spirit Data Capture is based in Preston Brook, Cheshire. The company is a totally independent mobile computing and data capture house, with in-depth knowledge of the latest wireless and mobile computing technologies which boost productivity and profitability. Its services include planning, design and development, implementation, and support.
