

Press release. 20th September 2018

Spirit Data Capture - 'Highly Commended' in the first MSH awards

Spirit Data Capture Limited, the specialist independent mobile enterprise consultancy, was amongst the winners in the first-ever Managed Services and Hosting (MSH) awards. Spirit was Highly Commended in the 'Best Enterprise MSP Project' category.

The 2018 Managed Services and Hosting awards were held in London on 19th September. Spirit's award came as a result of the unique range of managed service packages it has developed to

meet different business needs. These include a highly personalised service, an end-to-end support package, and access to the company's highly trained mobility experts.

The company's services range from provisioning, installation and training right through to complete end user support. Spirit engages with and supports its customers at all stages of the mobile enterprise lifecycle. One of its key solutions is

SOTI's MobiControl, the UK's leading enterprise mobility management (EMM) solution.

Ebbie Khadem, the company's Managing Director, says: "We're delighted to have been one of the first companies to have been chosen for one of these new awards. Being Highly Commended is a reflection of the experience, expertise and skills of our personnel, and they all fully deserve this recognition. We've developed an exciting range of managed services for our clients and we are continuing to enhance these and to add to them."

ENDS

Notes for Editors: Spirit Data Capture is an independent consultancy specialising in mobile enterprise solutions. Based in Sutton Weaver, Cheshire, the company has extensive experience of wireless and mobile computing technologies. It is committed to sourcing solutions that will streamline its customers' operations and boost their productivity.
