

**Press Release. 12th September 2013**

## **SPIRIT XPLORES THE NEW RANGERX**

Spirit Data Capture Limited, the independent mobile computing and data capture consultancy, has announced the arrival of the new RangerX rugged Android tablet from Explore Technologies. The RangerX is a new, lightweight but powerful tablet designed for use in the most challenging conditions. Spirit is a partner of Xplore and distributes the company's products within the UK and Ireland.

The RangerX is Xplore's first fully-rugged Android tablet. It has the largest storage capacity on the market and a vibrant, multi-touch display that can be read easily outdoors. The rugged nature of the 10.1 inch tablet is underlined by its IP65 rating. It is therefore ideal for field-based applications in the utilities, energy, warehousing, logistics, transportation and many other industry sectors.

The RangerX is the only rugged Android tablet to provide an optional integrated module with Gigabit Ethernet and HDMI-In connections, also making it ideal for satellite, cable, broadband and telecoms providers. The device has a battery life up to ten hours to maximise time in the field and comes with a standard three-year warranty,

Mark Holleran, President and Chief Operating Officer of Xplore Technologies, said: "The RangerX is the most durable Android tablet available. It reduces

the number of tools that field service workers need. With the capability provided by the optional HDMI-In and Gigabit Ethernet, not only do they have the perfect tool for work-order management, but they can also validate and diagnose installation or service issues on-site with one device.”

Ebbie Khadem, Spirit’s Managing Director, added: “We are delighted to be able to offer this great new tablet from Xplore, which is packed with useful features and capabilities. The RangerX provides field-based companies with a versatile device that will boost their overall operational efficiency whilst minimizing the total cost of ownership. It will be particularly welcomed by workers who need a reliable and powerful tablet that can cope with extreme conditions and hazardous environments.”

ENDS

**Notes for Editors:** Spirit Data Capture is based in Sutton Weaver, Cheshire. The company is an independent mobile computing and data capture house, with an in-depth knowledge of the latest wireless and mobile computing technologies which boost productivity and profitability.

Spirit’s capabilities include software application development, mobile computing technology (e.g. rugged mobile computers), wireless network implementations, maintenance and other services. Its extensive client base includes a diverse array of organisations in the utilities, field service, transport and logistics, healthcare, government and manufacturing sectors.
